

## RealLegal iBinder™

**The 'Double Duty' Application: Powering Your Anytime, Anywhere Workspace and Your Court Reporter's Transcript Repository**

RealLegal iBinder brings unprecedented convenience and accessibility to multi-jurisdictional litigation as well as smaller-scale cases.

RealLegal iBinder is a Web-based discovery management application that powers two service models:

(1) deployed to law firms as a collaborative tool or mobile workspace, or

(2) used by court reporting and litigation support agencies as a secure extranet for the transcripts, documents and video from a case.

Many attorneys use RealLegal iBinder in both capacities.

RealLegal® iBinder™ empowers attorneys to work on their cases from any airport, hotel or cyber cafe in the world. On any given day, your co-counsel may be snorkeling in the Caribbean while you are deposing a witness in rural Montana. RealLegal iBinder removes all geographic barriers so that you, remote co-counsel, experts and other authorized collaborators are assured anytime, anywhere access to transcripts, documents, video and more. **No special software is required to use the centralized workspace.**

### WHAT CAN I ACCESS FROM IBINDER?

Transcripts ♦ Scanned exhibits and documents ♦ Issue codes ♦ Synced video ♦ Publisher Bundles™

### WHAT CAN I DO WITH IBINDER?

#### View, Search & Locate

Open and view all of the contents within embedded, high-performance viewers

Watch video depositions or other digital footage in the provided player

Locate specific transcripts by searching transcript text, title names or dates

Located specific documents by searching various document property fields

Locate keywords using the Hyperlinked Word Index

Zoom and rotate documents

Jump directly to where exhibits are marked

#### Collaborate, Annotate & Strategize

Apply issue codes and add comments to testimony

Schedule future depositions

Manage calendars for the litigation team

Communicate with others using the Message Board

Discuss strategies in realtime using the iChat Room

Print transcripts and documents to any connected printer

Set varying levels of authorization to different collaborators

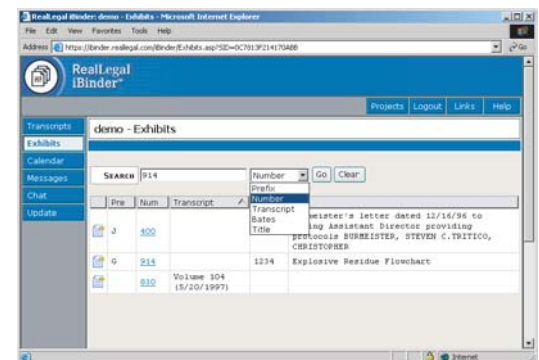

Synchronize with projects in RealLegal Binder desktop software (if applicable)

### HOW DOES IT WORK?

RealLegal iBinder users only need a computer with a standard Internet connection. No special software needs to be loaded on the computer. Using usernames and passwords, authorized users login from anywhere, at anytime. The system is entirely secure, and all actions are logged.

### HOW DO I GET STARTED?

Choose (1) to lease the service from RealLegal, (2) to deploy RealLegal iBinder to your firm's Web server, (3) and/or to use your court reporter's RealLegal iBinder Repository. Call 1.888.584.9988 ext. 4 for details.

Above: This RealLegal iBinder interface shows the user locating an exhibit by searching for number "914".
